DREER'S RELIABLE SEEDS

FOR MARKET GARDENERS

For the past eighty-nine years the house of "Dreer" has been noted for the high quality of their Vegetable Seeds, and during that time has furnished many leading truckers throughout the Country with their supplies, thus gaining a national reputation for reliability and good quality. We will not knowingly send out seeds of doubtful character and for the protection of our customers, invariably make a thorough and critical test of all seeds received from our growers and they must be of the highest degree of germination. During the summer, we also conduct extensive purity tests at our Trial Grounds and thus know the quality of our seeds, both as to their germination and purity. We are in position to give prompt attention to all orders and will greatly appreciate your patronage.

Information to Customers Ordering from this Catalogue

Cash with order. Remittances should be made by Post-Office Money Orders, Drafts on New York or Philadelphia banks, or Express Money Orders. Where it is not possible to obtain these, the letter should be registered. We cannot guarantee receipt of money sent in any other way. Goods desired C. O. D. must be accompanied by a partial remittance to guarantee acceptance. No perishable stock will be sent C. O. D.

Seeds by Parcel Post. We deliver prepaid to any Post Office in the United States, all orders for ounces, quarter-pounds and single pounds of Vegetable Seeds unless otherwise specified. If Beans, Sweet Corn or Peas are wanted sent by Parcel Post, add extra at the rates given on pages on which these seeds are offered. Bulky items, such as Field and Grass Seeds, Onion Sets, Potatoes, Vegetable Plants and Roots, Fertilizers, Insecticides, Garden Implements and Requisites of all kinds are sent by express, or freight at purchaser's expense.

Non-warranty. Henry A. Dreer, Inc., gives no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any Seeds, Bulbs or Plants they sell, and will not be in any way responsible for the crop. If the purchaser does not accept the goods on these terms, they are at once to be returned.

Special low express rates. As seeds are now taken when packed in boxes or bags, by Express Companies at the second-class rates, it is a great advantage to those ordering in quantities which are not offered postpaid to have their orders shipped by express. Large quantities can be shipped cheapest by freight, but require a longer time in transit. If the manner of shipment is left to us, we will always use our best judgment in the matter and decide to the interest of the customer.

Packing. We give special care to packing all orders and make no charge for boxes nor for delivery to freight depots or express offices in Philadelphia.

Plant Department. Our nurseries contain nearly three hundred acres, more than ten acres of which are covered by modern green-houses. We grow and supply large quantities of Palms, Ferns, Roses, Dahlias, Cannas, Hardy Perennial Plants, etc. These are fully described in our **Garden Book for 1927**, a copy of which will be mailed free if you are interested.

ALPHA TOMATO

DREER'S NEW EXTRA EARLY

In the development of this new strain, we have kept in mind, in addition to the importance of earliness, the necessity of obtaining fruits free from the misshapen and unmarketable specimens which appear among the product of most plants of the earliest types. Alpha, we are glad to say, is an outstanding exception in this regard, the fruits coming deep, round, and smooth, without cracks or other imperfections. Plants are very distinct with heavy wide foliage, and they bear in abundance bright scarlet fruits which ripen evenly right up to the stem, and which are solid and meaty. We anticipate that Alpha will soon supersede the Earliana strains, as it is decidedly superior in point of quality, and is marketable in most localities, slightly ahead of the latter.

Alpha Tomatoes, About 2-3 Natural Size

MARGLOBE TOMATO

This is a recent introduction of great merit, developed by the Bureau of Plant Industry, U. S. Dept. of Agriculture. It is as early as Bonny Best and produces large smooth, meaty, globular red fruits, which ripen evenly, and are free from cracks. An extremely heavy cropper, immense yields of excellent fruits being reported from every region where tried. At the department's Experimental Farm at Arlington, from a 3½ acre field, 21 tons per acre were picked, with still another light picking to make. This variety should be especially valuable to those who are in districts troubled with rust and wilt, and particularly in the Southern States, as this strain is immune.
Oz., \$1.00; ¼ lb., \$3.50; lb., \$12.00.

Preserving Tomatoes. The following small-fruited varieties are used for making preserves, and are also quite ornamental: **Pear-shaped Red, Pear-shaped Yellow, Yellow Plum, Yellow Cherry, Red Cherry, Red Currant, Red Peach, Strawberry, or Ground Cherry.**

Almost entirely of steel, well braced and adaptable to any conditions. Frame of stiff steel, extra long and high, closes to 10 inches and opens to 25. Handles adjustable up, down and sidewise.
